# Press Release

For immediate release  
April 1<sup>st</sup> 2003

## **THE ONLY GLOBAL MONITORING SOLUTION**

### **Introducing the IP2 CHOICE - Modular remote control in TCP/IP with scripteasy software**

From the new generation of AUDEMAT-AZTEC's remote control devices, IP2 CHOICE enables full control of all conditions on the transmitter site.

It acts as a gateway between the Ethernet or telephone network and the remote equipment.

### **- The MODULAR CHOICE**

This highly flexible modular unit can be made up of a mix of digital input boards, relay boards, analog metering channel boards and RS232/485 communication boards.

As a 2U-19" rack mounted unit it can be integrated with up to 16 boards. One unit can be equipped with up to 128 digital inputs or 64 digital inputs, 32 relays, 32 analog metering channels and 4 RS232 communication ports. The IP2 technology is accessible in the IP2 CHOICE through its embedded website offering powerful IP2 services (HTTP, SMTP, SNMP, FTP...) for remote IP connection, alarm dispatch via email, SMS ...

### **- As a STAND ALONE UNIT**

As a stand alone unit, IP2 CHOICE can be adapted for the users requirements in remote monitoring, it can also be used with the GOLDENEAGLE to carry operations on remote transmitter sites; audio streaming, RF monitoring .... etc.

**AUDEMATAZTEC**

- **As a GLOBAL MONITORING SOLUTION**

Using the IP2 CHOICE with the GOLDENEAGLE and the MANAGER Web server software , AUDEMAT-AZTEC redefines the concept of Global monitoring offering **Total network management**. Alarms received from remote GOLDENEAGLE and IP2 CHOICE located at the transmitter site can be centralized in one powerful software program, along with site configuration.

The SCRIPTEASY software also NEW from AUDEMAT-AZTEC can be incorporated in the Global monitoring solution with the IP2 CHOICE adding a graphical user friendly aspect to transmitter sites configuration (inputs and outputs)

With the I/O SCRIPTEASY software complex scripts can be easily configured , saved and tested for automatic actions. Scripts are graphically configured using the symbol library and logic functions attached with I/O. A scheduler is available for time-based actions.

This JAVA APPLET can be used with any Internet Web Browser.

Come and see the LIVE Demonstration on Booth N2049 at the NAB 2003.

**AUDEMATAZTEC**

AUDEMATAZTEC ([www.audemat-aztec.com](http://www.audemat-aztec.com)) product range includes mobile radio metering units, remote monitoring in FM, AM and TV and world-class RDS and DARC encoders. Present in more 30 countries in Europe through a large distribution network AUDEMATAZTEC also has a subsidiary , AUDEMATAZTEC INC in Aventura, FL USA .
